Vianen KVS - Founded in 1979 as a manufacturer of kitchen ventilation systems, Vianen has developed into one of the leading players in high-tech, custom built, energy saving, marine ventilation systems.

Our professional and experienced technical engineers understand the high demands required of marine ventilation that are essential for health, safety and comfort on board.

A balanced ventilation system is vital in the galley. To ventilate efficiently, sufficient attention must be given to the energy performance, the comfort and the ease of use for the user and the operational costs.

The Beaufort is designed for energy saving resulting in significant reductions in duct sizing and air treatment units.

Vianen ventilation systems excel by a variety of advanced technical features making them a high-performance, energy saving, low maintenance solution even for the most demanding environments.
